STYLE OPTIONS

WELDED PANELS

All Malden Metals welded fence panels are welded at every rail intersection from the bottom of the rail. This ensures a smooth, sleek finish and makes screws a thing of the past. The strong welds will be able to withstand even the harshest of Canadian weather.

10 YEAR LIMITED WARRANTY

Malden Metals fencing products are manufactured using some of the strongest and top-performing materials in the industry. Malden Metals is extremely confident in the manufacturing of its materials and as so is proud to offer a 10-year limited warranty.

TRUE GUARD™ PROTECTION SYSTEM

- ▶ To prevent rusting from base material, all of our products are galvanized and have a Zinc Mass of 180g inside and out.
- ▶ To ensure superior adhesion, each of our products undergo seven stages of pre-treatment with zinc-rich phosphate.
- ▶ To cover all welds and cut edges, zinc-rich epoxy primer powder coating are applied.
- ▶ To achieve exceptional anti-corrosion and weather resistant performance, polyester finish powder coating are administered to our products.
