

MALDEN METALS

STEEL WALK GATES

Malden Metals steel walk gates are welded at all intersections. The solid, sleek design will flow from fence to gate and are built for Canada's unpredictable weather.

TRUE GUARD™ - 7 STAGES OF PROTECTION

Corrosion is major problem in ornamental steel fences. Malden Metals steel walk gates are pre-galvanized to prevent rusting and corrosion. The gates also go through 7 stages of pre-treatment with zinc-rich phosphate. All welds are powder coated in zinc-rich epoxy primer as well as a polyester finish powder coating. Malden Metals takes corrosion and weather resistance very seriously and as so takes these additional steps to make sure your fence is strong and durable.
